

Rubber Mulch Installed in Playgrounds

The Township has installed a Playsafer™ rubber mulch product in the play areas at Town Hall and Southeastern Parks. (Rubber mulch will be installed at the Steel City Park play area following the improvements to the park planned for 2011). The colored mulch, which is made up of non-toxic rubber chips that are odorless and stainless,

will provide a safe cushion for falls and playground impacts. The product requires very little maintenance and is guaranteed to last a lifetime, which will reduce the yearly cost for wood mulch replacement at our playgrounds. The rubber curbing surrounding the play areas is seamless and splinter-free and has been installed with ramps to make them ADA accessible.
