**Subject:** PennEast Pipeline Update - Current Preferred Alternative

Good afternoon,

PennEast engineers have revised and refined portions of the proposed route based on additional feedback from numerous stakeholders. The Current Preferred Alternative replaces the route submitted in January 2015. The largest variations from Prior Alternative 6 are related to the location of the crossing of the Bethlehem Authority water supply main lines (between MP 44 and MP 45), Appalachian Trail crossing (between MP 46 and MP 55), existing subdivision plans for Trio Farms (between MP 59 and 62), and existing Huntington Knolls housing development plans (between MP 77 and MP 80). Additional field data gained through ground survey and property owner consultations resulted in a few smaller adjustments.

In addition to the route variations noted above, an additional interconnect was needed for the Gilbert Power Generation facility in Holland Township, New Jersey, which is fed by a small lateral to supply natural gas to the facility. The previously located interconnection with Elizabethtown Gas was relocated so that both interconnects can be co-located within the power station's industrial property to minimize additional above-ground impacts.

The revised maps are available on the [PennEast website](#) and we are in the process of distributing the maps to the jurisdictional regulatory agencies and impacted municipalities. The public has the ability to use our [Interactive Map](#) to determine the proximity of their property to the new preferred alternative route. Impacted landowners within the 400-foot study corridor, both newly added and newly avoided, will also receive letters from Western Land Services later this week.

We anticipate additional minor reroutes throughout the next few months as we meet with more impacted landowners and receive additional data from ground surveys. I will keep you informed during each milestone and FERC filing. If you have questions or would like additional information, please feel free to contact me via email or at 844-347-7119.

Best regards,
