Leachate Discharge	Bethlehem POTW (City of Allentown backup)	No Change
Permitted Waste Types	<u>Municipal</u> (General Household Waste) <u>Construction/Demolition</u> <u>Residual</u> (Non-Hazardous Industrial)	No Change

Bethlehem Landfill is seeking to continue landfill operations by adding disposal capacity through a lateral expansion to the East and Northeast, known as the proposed Phase V Expansion. Landfills are a permitted Conditional Use under the Lower Saucon Township Zoning Ordinance on the properties proposed for the project, requiring Conditional Use Approval from Lower Saucon Township Council. A major modification to the landfill's PADEP Solid Waste Permit (Permit No. 100020), as well as land development approvals from Lower Saucon Township, will also be required.

¹ Including the Northern Realignment.

² Estimated as of February 2023; not including Northern Realignment (pending before PADEP, which would add approx. 2.3 years of capacity).
