**RE: Martins Creek Transmission Line Upgrade  
Parcel #**

Dear Property Owner,

PPL Electric Utilities will soon begin planned maintenance work on a power line that crosses your property or is located near your property.

To maintain safe and reliable service for you and your neighbors, we routinely monitor the power grid and replace poles, wires and other equipment when necessary. We also add new equipment, such as smart grid automation, to reduce the number and duration of electrical outages.

Most work on the PPL system is done by crews from the ground, though helicopters are used in a limited number of cases.

We expect the work near you to commence around July 2019 and be completed by October 2020. Please note, this project will not require a service disruption at your home.

We appreciate your patience and cooperation while crews complete these improvements. Any disturbance caused by the construction, maintenance and upgrade activities will be repaired by PPL Electric Utilities following completion of the transmission line work.

If you have any questions or concerns, please feel free to contact me at 570-348-1620 or [Mike.biviano@contractlandstaff.com](mailto:Mike.biviano@contractlandstaff.com).

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Biviano". The signature is fluid and cursive, with the first name "Mike" and last name "Biviano" clearly distinguishable.
